SHANNON PESTKA JOINS SEARCH REAL FAST

DALLAS (SMU) – Search Real Fast, a self-directed online technology and patent search service, is pleased to announce that Ms. Shannon Pestka has joined our firm as its Sales Director.

“Shannon is very experienced in understanding the technology transfer process and what solutions might impact the profitability of a research office. In addition, she is well known and well respected by many technology transfer leaders. We are excited to have her join our team,” said Jim Hummel, Business Development Director of Search Real Fast.

About Search Real Fast

The mission of Search Real Fast is to help an inventor or researcher control the time and money risks in the “idea to commercialization” process. By combining the best keywords with a display of the most important sentences, PRF Query offers inventors and researchers an iterative process to help validate and refine their ideas and improve their written description for their formal disclosure documents. The company was launched in the fall of 2011 under the name of Patents Real Fast LLC after the PRF research team finished developing their unique keyword extraction technology. The research effort was initiated by Pete Fenner, President of Lightbus Technologies and Fenner Investments Limited and was directed by Dr. Margaret Dunham, Professor Emeritus of Computer Science at Southern Methodist University (SMU).
